

New Product **Therma Elite Door**

Introducing another new innovative product from Northwest Door. We have combined our time-proven Therma Tech II steel insulated garage door with a new precision made wood composite overlay.

Unlike some other products our new overlay will not come off, EVER. Our secured overlay stays put, it doesn't shrink and expand or move from it's original position.

The Therma Elite has amazing detail and the newly engineered beveled design profile on the overlay gives the door a distinctive pristine look, similar to our highest end aluminum Infinity Classic™ and Modern Classic™ garage doors.

R Value 10.4

You only get the best with the new Therma Elite from Northwest Door

New Beveled Type Overlay Profile

*Each door panel design segment is precision computer cut from a single sheet of wood composite overlay material.

The Therma Elite is extra heavy duty and 2-1/2" thick, 2" thick insulated steel sandwich door sections plus 1/2" thick wood composite overlay. The overlay is secured with waterproof adhesive and stainless steel screws, then Factory Sealed and Factory Prime Painted. Our doors feature both a Thermal Break and a Flexible Joint Seal with an R Value of 10.4 plus an optional R 12. Over 100 designs are available as standard and unlimited custom designs. Designs that include glass are standard with 3 mm single pane clear annealed. Double pane insulated, tinted or obscure glass types are optional. Steel door skins are Warrantied by Northwest Door against delamination for as long as you own your home, the wood composite overlay for a period of *(3) three years.

*Doors must be finish painted to validate NWD Warranty.

Doors sizes available:

Widths: 6'-0" to 18-0" in one inch increments

Heights: 6'-6" to 12"-0" in three inch increments

All doors are equipped with bracket mounted standard lift torsion spring hardware, 2" or 3" track depending on door size and weight. Other lift and mounting types are optional.

Black Decorative Hardware (handles & hinges) are available.
