

## PRODUCT UPDATE

**Date:** June 2012

**Update Number:** P2012-08

**Models Affected:** 3595, 3595C 3/4 HP AC Carriage House Garage Door Opener  
3585, 3585C 3/4 HP AC Belt Drive Garage Door Opener  
3800, 3800C Residential Jackshaft Garage Door Opener

**Subject:** Remote Control Upgrade to Security+® 315 MHz Elite Series® Garage Door Openers

Effective July 2012, the Elite Series® Security+® 315 MHz garage door openers will have an accessory upgrade. We will be removing the current 373P Premium Remote Control (qty. 1) and replacing it with the new 895MAX 3-Button Premium MAX remote control (qty. 1).

The new 895MAX is backwards compatible with LiftMaster® garage door openers manufactured since January 1993. The remote control packed in the box will be pre-learned to the garage door opener.

Please note that if you provide a second remote control to the consumer, and offer the 895MAX as their second remote, you will need to go into the programming sequence to learn it to the Security+® 315 MHz garage door opener.

Also, the 373P Premium Remote Control will be obsolete in August 2012. The 895MAX is the recommended replacement for this remote control.

If you have any questions, please contact your Sales Representative or our Technical Support Center at (800) 528-6563.
